

3PL Warehouse Management Software That **Scales as You Grow**

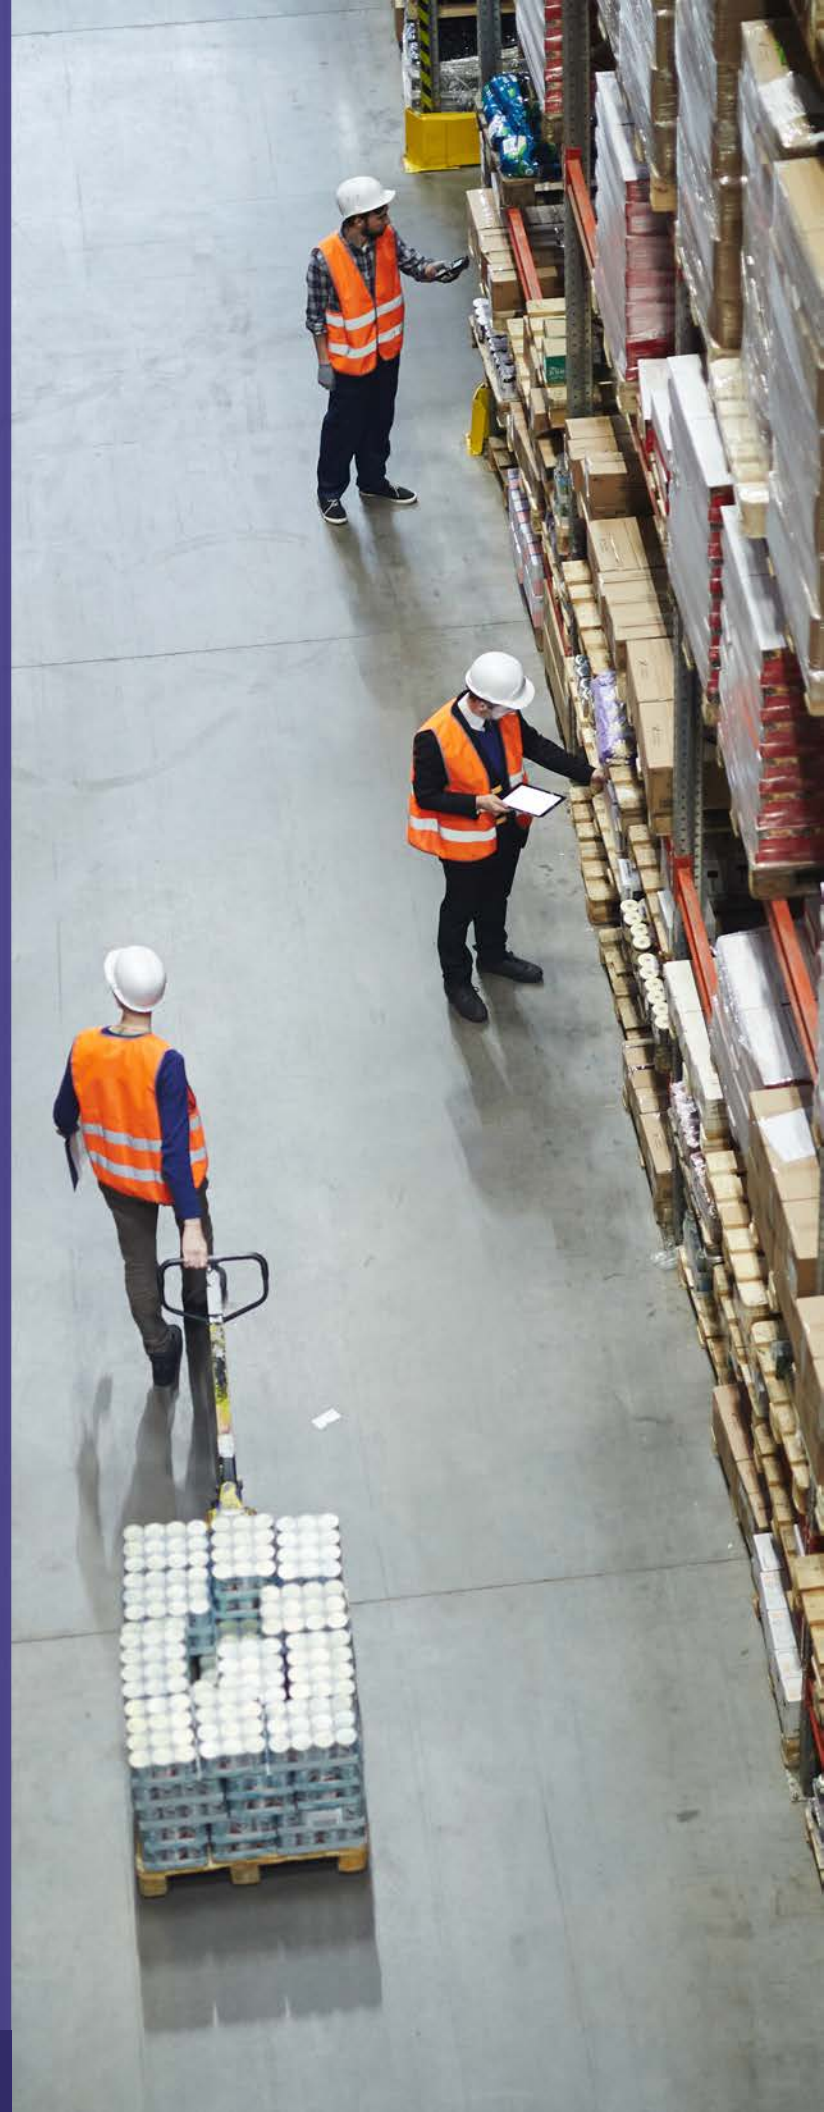

Automate your warehouse with a system that is as flexible and dynamic as your business.

Scale Your 3PL Business

Automate your warehouse management with a system that is as flexible and dynamic as your business. Is there a limit to the number of clients and warehouses you can manage with **LOGIWA**? We have yet to find out. As a third party logistics provider, we know that you don't just manage multiple sales channels. You manage multiple clients who have multiple sales channels. Two of the most common problems facing 3PL businesses like yours today are: Lack of real-time and reliable reporting and the inability to scale as the business grows.

Let's face it, processes that worked when your business was smaller just don't cut it when you start to see real growth. Bad data in your reports makes it impossible for you to update your clients with confidence. Analytics is one of the best ways to communicate your value, but putting together those monthly reports can be agonizing. **In steps LOGIWA, your 3PL Warehouse Management solution.**

Multiple Sales Channels, Warehouses, and Clients? **We've Got You.**

Our all-in-one dashboard gives you a bird's eye view of your clients' inventory, no matter where it is. Mobile device capability means there's nowhere in your warehouse that **LOGIWA** can't integrate. Our cutting-edge technology allows you to receive by the minute inventory and warehouse information. **What about your customers?** Give each of your customers access to their own custom portal that puts them in control of their business information.

Efficient Warehouse Operations That Make You More Money

It's no secret that inefficient warehouse processes keep your business from making more money. What would it mean for your business to reduce fulfillment costs by 30-50%? What about cutting your storage and handling costs by 10-25%? Our customers see these sorts of results, and their businesses are making more money and getting more clients.

100%

INVENTORY ACCURACY
WITH LOGIWA WMS

3PL Warehouses are Complicated. But What if They Weren't?

Your warehouses handle everything from everywhere. If your clients sell it, your picking, packing, and shipping it. You aren't handling just one type of product from one type of company. Your warehouse ops are an intricate house of cards, and it doesn't take much to knock them down. **LOGIWA'S** ability to connect to every aspect of your warehouses' operations means you can implement advanced fulfillment strategies and ship more, faster.
